Our Mission is to provide people with the most reliable and technically advanced light in the world.
History of the Armytek Company

Let’s start from the middle. Legally Armytek Optoelectronics Inc. was registered by Olga Khanoutin, the company’s President, in the beginning of the 2010 in Ontario, Canada.

But everything began much earlier. Starting from 2007 we have taken part in more than 50 international exhibitions in different continents. Now our product line consists of 32 models and 12 kinds of original accessories which are represented in 52 countries of the world, and in the nearest future 21 new models of flashlights will be released, which altogether will cover every significant sphere. Our corporation has multiple patents worldwide.

And you are able to throw almost all our flashlights from 10th floor height and submerge them at 50 meters.

Why? We’ve just put in such great margin of safety. 10 year no-hassle warranty.

We bust myths. No more compromises. Forget everything you’ve known about flashlights before.

So what distinguishes us from other companies?

- Canadian manufacturer and own factory.
- Designed especially for your needs.
- The team of scientists and engineers engaged in military and space industry.
- The best and tried-and-true components by the USA and Japan.
- Particular attention to durability and technologies, not only to external design.

Our Mission is to provide people with the most reliable and technically advanced light in the world.

How it was made?

We’ve got interested in LED lighting in 2007 and just like everyone – have become its active users because of its efficiency and convenience. But European and American companies that existed at that time at LED market
offered expensive and conservative products, being behind the world progress for years though reliable. From the other hand, Chinese manufacturers were producing beautiful and modern products at reasonable cost, but they were technologically "crude" at many aspects, as for them the outer varnish and repeat sales are much more valuable than quality and durability for years. They usually copied the look of the product using the domestic components and stated the same characteristics as in the prototype, but it was cheaper and nicer. That was a problem. We solve problems without doubts.

The most interesting part began.

1. **We have gathered an international group of developers from Canada and Europe.**

It consists of the best scientists, engineers and designers from military, aircraft and space industry. They are working hard to create the most innovative and technically advanced flashlights in the world. It's amazing that secret military technologies can uncompromisingly serve the humanity.

In fact only such people can find the presumptive problems in the design, optics, electronics and power supplies. Wherever and whenever. Our engineers never agree to compromises and are aimed to refine every detail, find the best material – and they can do it due to the great experience and invariable intention to reach perfection.

2. **For many years we've been accumulating experience and thoroughly investigating the real requirements of the final customers who wanted to get a high-quality and reliable light.**

We speak about military officers and Special Forces, hunters and divers, rescuers and firemen, speleologists and bikers – all the enthusiastic and demanding people.

As the users of LED lights – we are not interested in the “dry” list of unnecessary options which the manufacturers consider meaningful. The product we need has to fit our real-world requirements and embrace the features that are valuable and unique especially for us.
To create reliable lighting products we completely refused to apply Chinese components from the domestic market i.e. cheap analogs of well-known brands.

We decided to implement in our products only the best LEDs and cutting-edge electronics made in Japan and the USA to obtain the revolutionary and unprecedented results.

We’ve created our first tactical flashlight “Predator” from the ground up, and it has compiled a plenty of innovative solutions (in which at the beginning many people even refused to believe). Leaping ahead we may say that Chinese manufacturers haven’t even been able to replicate our technologies using cheap components so they’ve just copied its names without real implementing in the products (e.g. Firefly Technology). Meanwhile we started the hard tests of Predator in severe conditions of torrid USA deserts and frosts of north Canada.

In 2009 we have made a strategically right decision to open our own factory in China.

It was made to enable us to provide our customers all over the world with robust and submersible high-tech flashlights at the best prices and in the shortest time. The great characteristics of our lights are for years confirmed by the reviewers’ measurement, opinions of real users and positive feedbacks of Special Forces.

Nowadays our manufacture is a factory containing all the modern production facilities, high-end equipment, ultra reliable materials and special system of quality-control.

Our name “Armytek” wasn’t chosen accidentally. It’s the reflection of the main idea: the army requirements to the reliability of our products and the latest world technologies in use.

Here’s an amazing fact – when we use the most advanced technologies on the edge of possibilities we discover the real engineers’ art – to find the ideal solution that will give the highest possible features, valuable to each customer group.

Branches of our corporation are scattered all over the world. This is because a small group of professionals turned into a solid team of likeminded people, active and ambitious. We are totally sure in the result we reach and are really interested in the thing we do for you.

These advantages that distinguish us from our competitors enabled us to enter the new stage in the development and take a worthy place at the LED lighting market.

We successfully maintain the sale of our products made with advanced technologies. For the past few years we’ve established contacts with clients from more that 52 countries. Armytek bases the partnership upon trust and tries to satisfy the most daring requirements of its customers. Constant and continuous feedback enables us to react fast to the customers’ needs and improve our products each time overriding ourselves.

Our team is totally goal-oriented, that allows us to look forward straightly and confidently and not only to keep pace with the time, but to move ahead, setting the trend.

Multi-flashlights

**Armytek Catalogue**

**New electronics, optics and construction!**

**Armytek Catalogue | 2018**

---

**Wizard PRO Magnet USB**

**Multi-flashlight**

- **Modes:** 11
- **Length:** 110 mm
- **Head:** 29 mm
- **Body:** 24.5 mm
- **Weight:** 65 g

**LED Cree XHP50**

- **White or warm light**

**What’s included:**
1. clip
2. plastic holder
3. magnet USB charger
4. 2 spare O-rings
5. headband
6. 18650 Li-Ion battery
7. headband

**2300 lumens**

1x18650 Li-Ion (included, 3200 mAh)

**130 meters**

---

**Optics Type & Hotspot/Spill:**

- **TIR 70°-120°**
- **70°:120°**

---

**What’s included:**

1. - clip
2. - plastic holder
3. - magnet USB charger
4. - 2 spare O-rings
5. - headband
6. - 18650 Li-Ion battery
7. - headband

---

**Efficient TIR-optics**

The most efficient TIR-optics provides even wide light at the distance up to 130 meters and perfectly suits for either close application or a huge area illumination. Continuous use without an effect of “tunnel vision”.

---

**Reliable mount & comfortable operation**

Comfortable headband for reliable fixation of the flashlight – it won’t slip even while you’re running. Side switch and the function of quick access to the main modes guarantees a simple one-hand operation. The flashlight won’t shift or slide down from the head.

---

**N E W  e l e c t r o n i c s ,  o p t i c s  a n d  c o n s t r u c t i o n!**

**What's included:**

Efficient TIR-optics & constant bright light

Cree XP-L LED provides 1050 LED lumens light output. Efficient TIR-optics protects your eyes from “tunnel vision” effect and provides wide light for efficient area illumination. Prolonged runtimes - up to 60 days with one power element.

Easy control & 11 modes

Quick-detachable headband provides comfortable fixation on the head. A clip and a hand band are created for comfortable carrying on a belt and on the hand. The flashlight can be easily attached to metal surfaces with removable magnet.

Light-weight, durable & waterproof

Efficient TIR-optics & impressive brightness

Easy operation & 6 brightness modes

Made of aircraft-grade aluminum using the Slim Profile Technology in combination with functional ergonomic design. Guaranteed durability – stands up harsh impacts and falling from 10 meters height. The flashlight works for 2 hours at 10 meters depth.

Compact-sized flashlight with powerful light powered by only one AA / 14500 Li-Ion battery. Effective TIR-optics for even area illumination at the distance and no effect of «tunnel vision» even during continuous use.

Side switch on the head for quick and easy one-hand operation. Wide output choice for various spheres of application: from ultra-bright Maximum mode to ultra-low Firefly.

6 - headband
7 - 18650 Li-Ion battery

**Powerful multi-flashlight**
The headlamp, powered by only one battery, operates up to 200 days and has up to 1050 LED lumens brightness. Wide light without a “tunnel vision” effect and 6 convenient brightness modes perfectly suits for either close application or a huge area illumination.

**Micro-USB rechargeable, but IP68 waterproof & dustproof**
Solid body without long wires, weak rubber connectors and unnecessary boxes provides total protection from water, dirt and dust penetration. Flashlight continues to work even at the depth of 10 meters.

**LED Cree XP-L**
White or warm light

**Lamp Mode**
Use the flashlight while charging. The flashlight works in lamp mode without battery. In Firefly1, Firefly2, Main1 and Main2 modes. This function has never been used in flashlights. This makes Armytek Elf even more multifunctional.

**Easy to use**
Reliable headband made of soft elastic material provides comfortable fixation on the head. Side switch button lets to operate the multi-flashlight easily with one hand.

3 - clip
4 - rubber grip
5 - rubber button
6 - 2 spare O-rings

What’s included:

Extreme beam distance
Due to Long-Range Optics Technology even with a compact-size reflector your target is detectable at 451 meters distance. Distinct hotspot and minimal spill guarantee directed aim illumination. New XHP35 HI LED provides impressive brightness 1700 lumens.

Constant ultra bright Light
Due to FLAT Runtime Technology the brightness remains constant even in -25°C frost or with almost discharged batteries. Even in Maximal mode the brightness is the same for the whole operation time.

Designed for weapon mounting
Standard 1” body diameter matches up with most weapon mounts. Reliable body, red/green/blue filters and original remote switches for comfortable Hunting and secure Military application. No failures while shooting.

Light-weight, durable & waterproof
Made of aircraft-grade aluminium using the Slim Profile Technology. Guaranteed durability — stands up the recoil of any gun gauge and falling from 30 meters height. The flashlight works for more than 5 hours at 50 meters depth.

6 - 2 spare O-rings

**What’s included:**

1 - holster
2 - lanyard
3 - clip
4 - rubber grip
5 - rubber button
6 - 2 spare O-rings

**Extreme beam distance**

- Due to Long-Range Optics Technology the target is detectable at 366 meters distance. Distinct hotspot and minimal spill guarantee directed aim illumination. XP-L LED provides impressive brightness 1250 lumens.

**Designed for weapon mounting**

- Standard 1" body diameter matches up with most weapon mounts. Reliable body, red / green / blue filters and original remote switches for comfortable Hunting and secure Military application.

**Durable & waterproof**

- Made of aircraft-grade aluminum using the Slim Profile Technology. Guaranteed durability – stands up the recoil of any gun gauge, harsh impacts, vibrations and falling from 30 meters height. The flashlight works more than 5 hours at 50 meters depth.

**Up to 18 days of light**

- Continuous runtime with 18650 Li-Ion battery due to the Firefly technology. Compatible with rechargeable 18650 Li-Ion, 18350 Li-Ion, R123 Li-Ion and non-rechargeable CR123A batteries.

**Due to Long-Range Optics Technology the target is detectable at 366 meters distance. Distinct hotspot and minimal spill guarantee directed aim illumination. XP-L LED provides impressive brightness 1250 lumens.**

**Extreme beam distance**
Due to Long-Range Optics Technology the target is detectable at 395 meters distance. Distinct hotspot guarantees perfect illumination of distance up to a required object. Focused narrow light with impressive brightness 1700 lumens for precise aiming.

**Highly reliable**
The highest standards of durability: solid-state construction and efficient protection of internal components guarantee no-break work of the flashlight - it stands up to recoil of 12 gauge shotgun and falling from 30 meters.

**Easy to carry and operate**
Compact size and light weight for using on the weapon. Steel bezel protect the glass from fallings and impacts. Several brightness modes for multipurpose use in different situations and simple user-interface for comfortable one-hand operation of the flashlight.

**Designed for weapon mounting**
Standard 1” body diameter matches up with most weapon mounts. Underbarrel flashlight with reliable body and original remote switches for comfortable Hunting and secure Military application.

Accessories
Armytek Weapon Mounts

**AWM-01**
- 2 mounts in the set
- Diameter range: 8 - 23.5 mm and 10.5 – 26 mm*
- For flashlights with the head diameter up to 42 mm

**AWM-02**
- Diameter range: 19.5 – 35 mm*
- For flashlights with the head diameter up to 64 mm

**Magnet AWM-03**
- Attaching in one motion, without any assembling
- Made of frost-proof and robust materials
- Extra strong double magnets up to 18lb (8kg)
- Durable and anti-impact design
- Protection from scratches of weapon and flashlight
- Fits weapon with diameters 0.3-1.2" (8-30mm)
- Pass to flashlight with diameter of body 1” / 25.4mm and head up to 2.52” / 64mm
- Lightweight & compact: 2.1”x1.5”x1.9” / 2.7oz (54x39x48mm / 77g)

- For mounting on shotguns and rifles
- Made of durable steel for maximal reliability
- Heat-resistant silicone inside to avoid scratching and flashlight falling caused by recoil
- Extended screws for mounting on barrel of larger diameter
- Thoroughly designed construction for mounting on almost all types of weapons, including side-By-side and over and under double barrels
Color filters & Diffusers

Filters for flashlights are developed and designed to extend the opportunities of usage and in fact make your device multifunctional and more efficient.

Compatible with:
- AF-39
  - Predator / Predator Pro
  - Viking / Viking Pro
- AF-34
  - Dobermann / Dobermann Pro
- AF-24
  - Partner Series
  - Prime Series

Green Filters are used mostly in hunting and tactics. Green light doesn’t frighten animals and its beam can’t be seen from aside so it makes impossible to disclose your location.

Red Filter is good for reading maps and navigating. It doesn’t disturb night vision and can be used as signal light. Has the same features as the green filter.

Blue Filter is the best for navigating and reading because you can better distinguish lines and marks in blue light. Can also be used with night vision equipment.

White Diffuser for flashlights converts the focused light into a flood beam. Wider beam angle is better for close-distance applications as reading, lightening a tent or a small room, car repair and so on. The beam covers larger area and provides clear and comfortable lighting.

Grease

NyoGel 760G

Multipurpose silicone grease for lubrication and protection of electrical contacts and connections. Ideal for flashlights’ threads and O-rings.

- Thick and dense, doesn’t flow under its own weight
- High thermal resistance (-40...+135°C)
- Doesn’t dry out and is fully waterproof
- Doesn’t dissolve in water and other liquids
- Reliably protects all parts of flashlight from wearing out
Remote Switch
for Armytek Flashlights

Specially designed remote switch with curl cord allows you to use your flashlight with most types of weapon. The length of cord can vary from 25 to 70 cm.

Compatible with:
- Barracuda / Barracuda Pro
- Predator / Predator Pro
- Viking / Viking Pro
- Dobermann / Dobermann Pro
- Partner C2/C4 or Partner C2/C4 Pro

Armytek Bicycle and Hard Hat Mounts

- Reliable fixation of Wizard / Tiara / Elf flashlights
- Lightweight and made from robust materials
- Easy to use and install in one motion

External battery 10000 mAh
with Powerbank function

- Fits Wizard / Elf C2 flashlights
- Supports any 18650 batteries
- Easy to install and use
- IP68 water- and dustproof standard
Chargers & Batteries
Armytek 18650 Li-Ion batteries 3.7V Rechargeable, protected

- Made in Japan high-grade ICs (Seiko). They are notable for low power requirement and high reliability. It means you get more advanced device performance.
- The best chemistry in the world - Panasonic (Japan). Stands out for high discharge rates and long life span.
- Possibility to work even under heavy loading. You will appreciate high battery discharge rate – up to 7.5 Amperes. We use quadruple brand MOSFETs! You can use them in severe conditions - they won’t let you down even if you give up.
- Triple protection against short, over-discharge, over-charge. You get the power supply, which is totally protected from any damage and enjoy its maximal performance and improved voltage stability. Certainly you won’t face battery failure.
- 304 Stainless steel plate reinforced bottom. This unique structural design provides better impact-resistance.

Armytek CR123A lithium battery Non-rechargeable

- Ideal for LED flashlights, photo equipment, cameras, optics and other high current digital devices
- PCT protection for safety
- 3400 mAh • 3100 mAh • 2800 mAh
- 10 years - ultra long shelf life with low discharge
- Voltage 3.0V
- Capacity 1600 mAh
Universal chargers
with power supply inside

- Supports IMR, Li-ion 4.2V, Li-ion 4.35V, Ni-MH, Ni-Cd and Li-FePO₄ batteries
- Car adapter included
- Quick charge with fully independent channels and 1A current for each
- Automatic battery type detection and Auto-memorization of last used mode
- Monolithic design with 110-240V and 12V power supply inside
- Easy control with one individual button per each channel
- Over-discharged and sleeping battery activation function with safe 0.1A current
- Designed for optimal heat dissipation and made with fire-proof materials

Armytek Uni C4 Pro / C2 Pro
with Car adapter

- Smart LCD clearly shows the progress and charging/refreshing parameters
- Battery refresh and restore capacity function

Armytek Uni C4 / C2
with Car adapter

- Multi-color LED indication with Night mode and useful 5 LEDs per channel
How to choose a flashlight easily

Our engineers and designers in Armytek thoroughly consider the application sphere for each flashlight model. That’s why it’s rather easy to select the most suitable variant for you. Just follow 3 simple steps and decide what flashlight is the best for you! Additionally you’ll find some tables at the next pages that will make your choice even easier.

By the way, when choosing the flashlight remember, that all our flashlights are available with warm or white light. Warm light is better for distinguishing colors and applying in the conditions of rain and fog in comparison with white light, which is in its turn 7% brighter.

**STEP 1**
For what tasks do you need a flashlight?

**STEP 2**
What brightness & power source suit better?

**STEP 3**
Do you need a basic or advanced Pro-version?

**Multi-flashlights**

Fully aluminum and water-resistant solid body without long wires, weak rubber connectors and unnecessary boxes. Customized with TIR-optics with comfortable wide light. Go with reliable headbands for applying as headlamps.

- **Wizard Pro Magnet USB (2300 lumens / 130 meters)** and **Wizard Magnet USB (1250 lumens / 119 meters)** are the most comfortable multi-flashlights powered by 1x18650 Li-Ion battery with Magnet USB charger and Li-Ion battery in set.
- **Tiara C1 Pro Magnet USB** and **Tiara C1 Magnet USB** provide amazing 1050 lumens light output and 106 meters of beam distance. Ready-to-use set with included Magnet USB charger and 18350 Li-Ion battery.
- **Tiara A1 Pro** and **Tiara A1** are the brightest flashlights with extremem beam distance up to 86 meters powered by very popular AA or powerful 14500 Li-Ion batteries. Their output reaches up to 600 lumens.
- Multi-flashlights **Elf C2** and **Elf C1** have function of charging with Micro-USB cable. They provide perfect 1050 lumens light output and powered by 18650/18350 Li-Ion battery, which is included in a set. Armytek Elf is able to work in a Lamp mode.

For differences between Pro and Regular versions see the comparasion charts at the next page.

**Every Day Carry Lights**

All EDC flashlights have a removable clip, a holster and a robust lanyard for easy carry and application.

If you prefer to operate a flashlight with a tail tactical switch choose reliable
tactical lights with TIR-optics – Partner models with different power sources: 1xAA, 2xAA, 1xCR123A, 1x18650, 2x18650. You decide either you want to get availability of AA battery or better brightness on lithium 18650 / CR123A battery.

EDC flashlights with TIR-optics specially created for the lovers of side switch operation are Prime Pro and Prime.

Prime C2 Pro Magnet USB (2100 LED lumens / 192 meters) and Prime C2 Magnet USB (1250 LED lumens / 174 meters) are ready to use with magnet USB charger and 18650 battery included in a set.

Prime C1 Pro Magnet USB and Prime C1 Magnet USB have 1050 lumens light output and perfect beam distance is up to 165 meters. They are powered by one 18350 battery and can be charged with magnet USB cable (included in a set).

Prime A1 Pro and Prime A1 powered by wide-spread AA batteries provide 600 lumens brightness and 115 meters beam distance.

Prime A2 Pro and Prime A2 with 2xAA batteries show the results of 850 lumens and 143 meters.

For differences between Pro and Regular versions see the comparasion charts at the next page

Tactical flashlights

Far-throwing and robust flashlight submersible to 50 meters and impact-resistant to 30 meters.

For using with rifles: Predator Pro (1700 lumens / 451 meters) or Predator (1200 lumens / 437 meters).

For applying with shotguns: Viking Pro (2300 lumens / 286 meters) or Viking (1250 lumens / 366 meters).

Cost-effective choice for weapon application is Dobermann Pro with 1700 lumens and 395 meters throw or Dobermann with 381 meters of directed light and 1200 lumens brightness.

We offer far-throwing flashlights with green and red light based on Dobermann and Predator models. They don’t frighten the game or reveal your location.

The best choice for applying with shotguns are also compact tactical flashlights with TIR-optics – Partners.

Partner C2 Pro (2100 lumens / 192 meters) and Partner C2 (1250 lumens / 174 meters) are the best combination of size and power: working on 1x18650 they compile in themselves the compact body.

If you want to get the brightest of compact weapon lights choose Partner C4 Pro (2300 lumens / 215 meters) or Partner C4 (1450 lumens / 193 meters) – with 2x18650 you get more power and brightness.

Partner C1 Pro and Partner C1 are the smallest but bright tactical lights powered by 1xCR123A battery: you get 800 lumens output & 131 meters throw with these small ones.

Partner A2 Pro and Partner A2 work on 2xAA batteries to achieve 850 lumens brightness and 143 meters beam distance.

Partner A1 Pro and Partner A1 are compact-size bright flashlights powered by very popular AA batteries. They provide 600 lumens output and 115 meters throw.

For differences between Pro and Regular versions see the comparasion charts at the next page

Searchlights

The most powerful and throwing flashlights: Barracuda Pro (1850 lumens / 800 meters) and Barracuda (1350 lumens / 775 meters) powered by 2x18650 batteries offer amazing beam distance. There is also a possibility of attaching a remote switch and using these “monster-flashlights” at weapon.

For differences between Pro and Regular versions see the comparasion charts at the next page

### Specifications

- **Wizard Pro Magnet USB**: 2300 lm, XHP50 LED, 1x18650 Li-Ion, 11 modes, 1 h runtime in Max mode, 30 min runtime in Min mode, 70° / 120° hotspot, FULL brightness stabilization.
- **Wizard Magnet USB**: 1250 lm, XP-L LED, 1x18650 Li-Ion, 6 modes, 1,5 h runtime in Max mode, 30 min runtime in Min mode, 70° / 120° hotspot, DIGITAL brightness stabilization.
- **Tiara C1 Pro Magnet USB**: 1050 lm, XP-L LED, 1x18350 Li-Ion, 11 modes, 30 min runtime in Max mode, 60 days runtime in Min mode, 70° / 120° hotspot, FULL brightness stabilization.
- **Tiara C1 Magnet USB**: 1050 lm, XP-L LED, 1x18350 Li-Ion, 10 modes, 30 min runtime in Max mode, 60 days runtime in Min mode, 70° / 120° hotspot, DIGITAL brightness stabilization.
- **Tiara A1 Pro**: 600 lm, 1xAA LED, 10 modes, 50 min runtime, 90 days runtime, 70° / 120° hotspot, FULL brightness stabilization.
- **Tiara A1**: 600 lm, 1xAA LED, 6 modes, 40 min runtime, 54 days runtime, 70° / 120° hotspot, DIGITAL brightness stabilization.
- **Elf C2 Micro-USB**: 1050 lm, XP-L LED, 1xAA, 6 modes, 2 h runtime in Max mode, 200 days runtime, 70° / 120° hotspot, FULL brightness stabilization.
- **Elf C1 Micro-USB**: 600 lm, XP-L LED, 6 modes, 40 min runtime, 54 days runtime, 70° / 120° hotspot, DIGITAL brightness stabilization.

### Additional Features

- **Magnet in the tailcap**: Available in all models except Tiara A1 and Elf C1 Micro-USB.
- **Charger + Battery**: Available in all models except Tiara C1 Pro and Tiara A1 Pro.
